Invitation to the Press

SEBRING -

The Highlands County Sheriff's Office has recently acquired a FARO 3D scanner for use in crime scene photography. This device provides digital measurement of millions of data points to document a crime scene or a traffic homicide investigation. It also has the capability of linking multiple scenes creating a walk-through of the crime scene or traffic crash.

Highlands County Sheriff's crime scene and traffic homicide investigators are receiving training on this scanner this week. On **Thursday, November 3rd at 10AM** these investigators and their instructor will be conducting a demonstration on this item. The demo will occur in **the training room at the main Sheriff's Office and will include both inside and outside segments**. The entire demonstration should take no more than 30 minutes.

All members of the media are invited to join us and preview this new scanner. Please contact HCSO Public Information Officer Nell Hays if you plan to attend this demonstration as we need to know how many people to accommodate.

Thank you in advance and we hope to see you on Thursday!
